

Peter Walker, Geography

University Senate seat

I have been a member of the UO faculty, jointly in the Geography Department and the Environmental Studies Program, since 1997. I have served in numerous university and department service capacities including department head; past member of the University Senate; member of the CAS Dean's Advisory Committee; and the UO President's Faculty Advisory Committee. I am strongly committed to the principles of shared governance. I am concerned about trends toward centralization of university decision-making. If elected I will advocate for greater recognition of the value of scholarly and creative leadership at the level of colleges, schools, departments, and programs.
