

Christina Wozniak, Candidate Statement

With 12 years of service as a UO employee and a recent MBA graduate from the university, I have gained a deep understanding of how our institution operates. My experiences range from working in a small department to serving in the central research service division under the Office of the Vice President for Research and Innovation (OVPRI). With this unique perspective, I am committed to advocating for the best possible solutions that address the diverse needs of those who support and are supported by the university. It would be my pleasure to utilize my broad knowledge and experiences to help promote a shared understanding in the decision-making process within the UO Senate.
