

Arkady Vaintrob, Mathematics

During my 20 years at the UO I was permanently involved in various issues related to undergraduate education. I ran undergraduate seminars and directed Honors theses. I worked as the Chair of the departmental Undergraduate Affairs Committee, Head Undergraduate Advisor, and a Curriculum Coordinator. I also served on numerous UO and CAS committees dealing with undergraduate programs (UOCC, ARC, CASCC, UO Senate). Maintaining and improving the quality of undergraduate education is one of central missions of the UO as a flagship university in the state of Oregon. I feel that my experience and knowledge can be helpful in fulfilling this mission. I was a member of the Undergraduate Council in 2006-2009. Many things have changed since then and I am ready and eager to serve on the Council again in the new environment.
