

Eric Grape, Campus Planning & Facilities Management

Employed by the University of Oregon (UO) since 2005, serving as utilities data coordinator under Campus Planning and Facilities Management (CPFM). My current position Program Technician with Central Power Plant/Utilities & Energy. Under the umbrella of CPFM I have worked closely with campus-wide Building Maintenance, Planning, Capital Construction, various administrative offices, Athletics/Housing/PE-REC, public utilities (EWEB, NWNG, CofE, LC), and construction contractors.

My greatest strength and sensitivity is molded into the capability of collaborating, understanding, and non-judgmentally observing people in most facets of life.

My education (many, many years) spanned political science, psychology, business and economics, business and criminal law, computer science, arts, math and sciences (MS 2000).

My employment, while manual until 30, was self-driven into computer science, environmental engineering, chemical toxicology/epidemiology, with a smattering of side-employment as science technician/researcher, environmental coordinator (Sierra Club), author, and creator/director of a community service non-profit.

Currently I am an active member of UO Diversity Committee.

Thank you. Eric
